Question:- Why do Toppers opt for the “Blackbook of Railway General Knowledge and General Science” (BBRGKS) Book?

- **Comprehensive yet concise:** The BBRGK stands out as the only Book that encompasses over 18,000+ RAILWAY General Knowledge questions dating from 2018 to the present. This extensive compilation is unparalleled and not found in any other publication.
- **Organized and Detailed Classification:** The Blackbook meticulously organizes questions into **Subjects, Topics, and Subtopics, extending up to five levels, all in chronological order.** This structured arrangement not only makes it easy to navigate but also offers a **textbook-like experience**, focusing exclusively on questions that have been asked in past RAILWAY exams.
- **Efficient Compilation:** The BBRGK excels in its smart compilation approach by consolidating repeated questions, effectively reducing the total count from 18,000+ to under 14,000. A unique feature, denoted by the “#R” symbol, indicates the frequency of each question's repetition, facilitating time-saving and enhancing learning efficiency.
- **Coverage of Latest Topics:** It includes an **additional list of important topics** that are regularly asked in recent RAILWAY examinations. These include Art & Culture (including Dance, Festivals, Songs, Films, Monuments, etc.), Census, Neighboring Countries, Books and Authors, Inventions, Instruments, Sports, Defence, Awards, and Appointments, ensuring comprehensive coverage of frequently asked topics.
- **Previous Year Question Papers:** The inclusion of 30 sets of the **latest previous year question papers** offers invaluable insights into the evolving pattern of competitive exams (covering Railway NTPC, Group-D etc.). This addition aids students in adapting to the current examination trends effectively.
- **Rapid Revision:** BBRGKS is the fastest tool to thoroughly revise RAILWAY's previous year's questions. It's designed for students who aim to **maximize their preparation in minimal time**, ensuring a quick yet comprehensive revision.

Question:- Why is the “Blackbook of Railway General Knowledge and General Science” provided in a one-liner format instead of an MCQ format?

- ✓ The “Blackbook of Railway General Knowledge and General Science” (BBRGKS) meticulously compiles over 18,000+ questions asked in various RAILWAY exams from 2018 to the present. To make this vast repository more efficient for study, questions deemed **outdated or redundant**, especially in current affairs, have been **removed**. This process, along with the **consolidation of repeated (#R) questions**, results in a streamlined collection of approximately 14,000 questions.
- ✓ To maintain practicality, these questions have been **transformed from their original MCQ format into one-liners**. This conversion is done **carefully to retain the essence** and educational value of each question. In cases where converting to a one-liner would compromise the question's integrity, it **remains in its MCQ format**. This approach ensures that the BBRGKS remains an effective tool for exam preparation, offering potential questions.
- ✓ Considering the book has approx. **450 pages with 14,000 questions**, adding explanations for each question would significantly increase both the **volume and the cost** of the book. Therefore, the BBRGK is designed to complement a detailed theory book. While our comprehensive GK theory book is currently in development, we recommend using any reputable theory book alongside the BBRGKS. This strategy allows students to cover topics thoroughly with the BBRGK and then delve deeper into each subject with a theory book. This dual approach not only clarifies the types of questions RAILWAY asks but also prepares students comprehensively for the topics and subjects covered in the exams.

HOW TO USE THIS BOOK

I want you to know that this is not a usual textbook, I would rather call it a smart compilation of previous year's General Knowledge and General Science Questions, which will not only help you to know what has been asked till date, but it will also help in analysing the question pattern. You will understand that Railways mostly ask majority of questions from specific topics only, questions asked may be new, but important and relevant topics will be the same. This book has also compressed the no. of questions by placing same questions as a single question, so you don't have to go through it multiple times.

Please note that this book is a gist for General Knowledge and General Science, compiled from latest previous year papers of Railways, which are originally in the form of MCQs converted into one liner form. Some questions, e.g., numerical in physics are provided with **detailed solutions** so that you would understand it clearly and know the type of numerical question asked by Railways.

It is expected to go through every question given in this book, depending upon time you may read important questions which have been asked multiple times. This book has been divided into several parts, which serves distinct objectives. Therefore, you need to refer and learn according to your needs and requirements of the examination.

One of the main objectives of compiling this book is to provide all latest questions asked by Railways till the very date for upcoming exams. Hence, I have added all new questions asked in Railways exams till **August 2024**.

PART - I:

This part contains Top 500 Questions which have been repeatedly asked in Railways exams. Readers are advised to go through this list to revise their concepts quickly and thus boost their score.

PART - II & III:

This section contains Social Science (viz. History, Geography, Ecology, Polity and Economics) and General Science (Physics, Chemistry, Biology, Computer) part of Railway General Awareness. Each chapter is equipped with top 100 most repetitive questions through QR scan. This one liner also shows the no. of times a question has been asked in Railway exam till date.

PART - IV:

This part contains several important topics which have been repeatedly asked by Railway Exams and includes questions from old as well as current pattern of exam. The current topics asked in previous exams lie in this section, which may be skimmed, but it's very important to read and analyse the kind of questions asked from this section. Therefore, you are expected to skim through this part.

PART - V:

This part consists of recently held 30 papers of Railways. This is intended for quick revision of topic wise lessons learnt in the previous chapters as well as to understand the pattern of latest questions asked in these exams.

Lastly, I want to reiterate that this is not a textbook, this is a smart shortcut book, designed specifically for Railway, SSC and related exams, to cover latest Railway PYQs in systematic, time efficient and smart manner.

Important Note:

After some questions, you will see **#R** written inside brackets.

- ✓ **#R** means how many times the question has been repeated, i.e., how many times this question has been asked so far.
